Virtual Scientific Inc
quality, accuracy, efficiency

Cytogenetic Services

Our Process Works for You

Virtual Scientific Inc is a CLIA certified cytogenetic laboratory. We cater to startups, labs experiencing personnel shortages, overflow and pathology groups without in-house cytogenetic services. Long term or short term commitments accepted. The wide range of customizable service packages allows us to meet your needs.

Our streamlined process allows us to return results in as little a 24 hours*.

VSI's virtual environment allows you to access your results online; anywhere, anytime. Automated email notifications alerts you when your cases are ready to be retrieved.

Services

What We Do:

Virtual Scientific is a full service cytogenetics laboratory specializing in post-natal and cancer cytogenetics.

Virtual Scientific accepts :

1. Wet Samples (BM, PB, Tissue)
2. G-Banded Slides
3. Digital Images

Our process is simple. Once your cases are received, VSI dedicates a group of NCA certified technologists to your samples. This ensures that your samples are analyzed to your specifications. Cases can be reported in as little as 24 hours.*

VSI has a true virtual environment. Our SSL encrypted website allows us to upload all images and documentation associated with your cases for easy access.

We work closely with your personnel to ensure seamless transactions between your organization and ours.

Competitive Pricing:

Our extremely streamlined process allows us to keep a low overhead, passing on the savings to our clients. Save up to 42% on your cost per case.

Contact us today for a customized service package.

Quality First

Our Staff:

Quality begins with personnel. We hire highly qualified NCA certified technologist. Our technologists average 18 years of experience in the field.

Quality Control:

Each case is analyzed by two certified cytogenetic technologists. Cases are then reviewed by a senior level technologist and/or supervisor and submitted to the laboratory director for sign out. Prior to reporting the results, all cases are then subjected to a verification process to ensure accuracy.

*24hr TAT quoted for cases submitted as digital images. Complex abnormal will require more time.
